Tra-Onyx Collection 2026

ENGLISH

Natural Stone, Precisely Selected.

Formed over geological ages, Tra-Onyx combines the layered character of travertine with the luminous depth of onyx. Defined by flowing mineral bands, subtle translucency, and a palette of warm ivory, honey, and earthy tones, it creates distinctive architectural surfaces with timeless elegance and natural movement.

ITALIANO

Pietra Naturale, Selezionata con Precisione.

Formatosi nel corso delle ere geologiche, l'Onice Travertino unisce la struttura stratificata del travertino alla profondità luminosa dell'onice. Definito da bande minerali fluide, delicata traslucenza e una palette di toni avorio, miele e sfumature naturali, dà vita a superfici architettoniche distintive caratterizzate da un'eleganza senza tempo e da un naturale senso di movimento.

العربية

الحجر الطبيعي، مُنتقى بعناية فائقة

تشكّل الأونيكس الترافرتيني عبر عصور جيولوجية طويلة، جامعا بين البنية الطبقية للترافرتين والعمق الضوئي المميز للأونيكس. وتمنحه طبقاته المعدنية المتدفقة وشفافيته الرقيقة وتدرجاته الدافئة من العاجي والعسلي إلى الألوان الترابية، حضوراً معمارياً فريداً يجمع بين الأناقة الخالدة والحركة الطبيعية.

РУССКИЙ

Натуральный камень, отобранный с точностью

Сформированный на протяжении геологических эпох, ониксовый травертин объединяет слоистый характер травертина и светящуюся глубину оникса. Плавные минеральные полосы, деликатная полупрозрачность и палитра тёплых оттенков слоновой кости, мёда и природных тонов создают выразительные архитектурные поверхности с неподвластной времени элегантностью и естественной динамикой.

Why Ardura?

Curated Architectural Palette

A carefully selected range of ivory, honey, earth, and deep mineral tones designed to complement contemporary and luxury interiors.

Refined Layered Expression

Distinctive mineral banding creates visual movement and depth while maintaining balance, elegance, and architectural harmony.

Natural Luminous Character

Selected translucent layers introduce subtle light interaction, enhancing depth and material richness without overwhelming the design.

Cohesive Collection Versatility

From light and airy compositions to bold and dramatic expressions, the collection offers a unified palette for diverse design visions.

Exceptional Visual Identity

Distinctive mineral banding, natural depth, and layered movement create striking surfaces with a unique, art-like character.

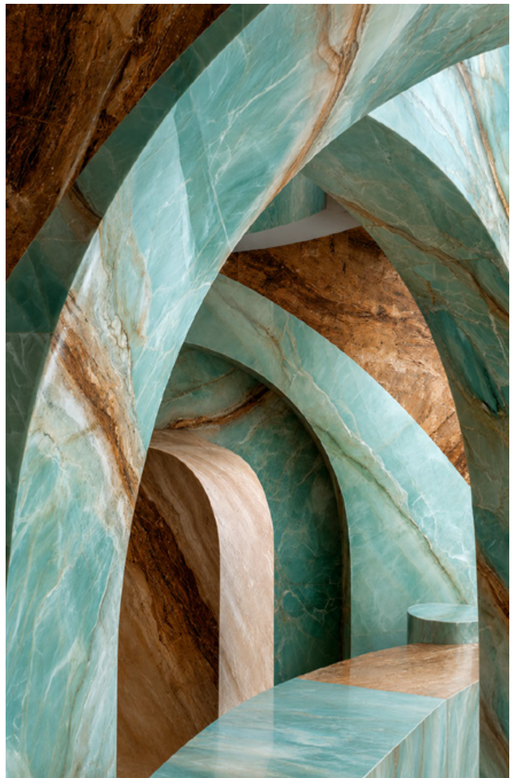
Controlled Quality & Consistency

Strict selection and processing standards to maintain structural integrity, surface quality, and visual continuity across project scopes.

Quarry-to-Project Oversight

End-to-end control ensures authenticity, traceability, and reliability.

Tra-Onyx Bnefits



1. Luminous Natural Depth

Subtle translucency within selected layers introduces visual depth and a soft luminous quality.

2. Flowing Layered Character

Natural mineral bands create a sense of movement and continuity, giving each surface a unique geological expression.

3. Warm & Sophisticated Palette

A refined spectrum of ivory, honey, earthy browns, and mineral tones brings warmth and timeless elegance to interior spaces.

4. Distinctive Architectural Presence

The combination of layered structure and luminous accents transforms surfaces into focal design elements with strong visual identity.

5. Balanced Beauty & Versatility

Combining the expressive character of onyx with the practicality of travertine, Tra-Onyx adapts effortlessly to a wide range of architectural applications.

6. Timeless Material Identity

Combining the warmth of travertine with the luminous sophistication of onyx, Tra-Onyx delivers enduring architectural appeal beyond short-lived trends.

- **Low Life Cycle Cost (LCC)**
- **Easy Care & Maintenance**
- **Favorable Life Cycle Assessment**
- **Environmentally Responsible Material**
- **Long-Term Durability**
- **Luxurious Appeal**
- **Fire & Heat Resistance**

Stone Advantages

Craft & Capability

Advanced Italian Machinery

Precision-driven production using leading Italian technology.

Integrated Production Network

A curated network of qualified production partners operating under centralized quality control and unified standards, ensuring consistent quality.

Vein Alignment & Bookmatching

Enabled through origin-level control and integrated processing.

Product Forms & Fabrication Capabilities

Quarry Blocks · Slabs · Tiles · Cut-to-Size · Mosaics · Pavers · Curbs · Custom Fabrication.

Single-Source Stone Solutions

A comprehensive portfolio covering a wide spectrum of natural stones enabling cohesive and streamlined material selection for complete projects.

Centralized Quality Control

A unified quality control system ensuring consistent quality, visual coherence, and performance standards across all stone types.

Consistency Across Batches & Reorders

Ensuring visual and technical consistency across production batches and repeat orders.

At Ardura Design, natural stone is more than a building material—it is an essential part of the architectural language. We believe material selection should be integrated into the design process from its earliest stages, allowing materials to shape architectural vision rather than simply fulfill technical specifications. By combining architectural expertise with a deep understanding of natural stone, realistic material visualization, custom fabrication capabilities, and a reliable supply network, we bridge the gap between design intent and practical execution. Every recommendation is developed to ensure that the materials envisioned during design can be delivered with consistency, precision, and lasting architectural value.

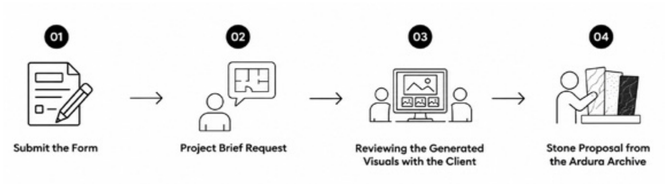
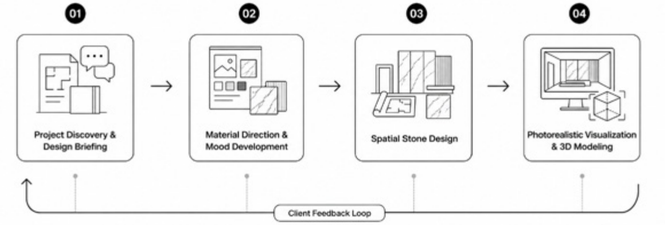
Ardura Design



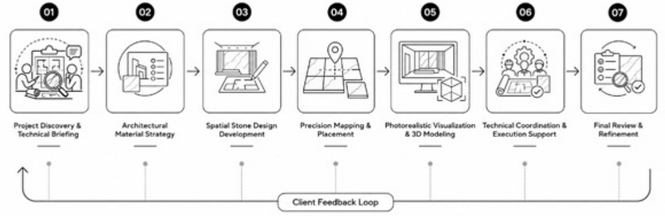
Basic Plan

The Basic Plan helps you choose the most suitable Ardura stone materials through design analysis and realistic visual simulations, ensuring each option aligns seamlessly with your space before execution.



Standard Plan

Share your project through drawings, references, or design intent, and we'll develop a complete spatial concept using real materials with high-quality visualizations, ensuring every design decision is validated before execution.



Premium Plan

The Premium Plan delivers a fully coordinated stone design process with precision stone mapping, technical collaboration, material sampling, and flawless execution from selection to installation.

Consumer Guide

Granite

A dense igneous stone offering exceptional strength, low water absorption, and outstanding resistance to abrasion, heat, and weathering. Ideal for high-traffic flooring, exterior paving, facades, and heavy-duty architectural applications.

Scratch Resistance	● ● ● ● ●
Stain Resistance	● ● ● ● ●
Acid Resistance	● ● ● ● ●
Heat Resistance	● ● ● ● ●
Freeze Resistance	● ● ● ● ●

Travertine

A naturally porous limestone characterized by warm color variation and strong architectural texture, widely used for interior flooring and wall cladding, façades, and landscaping, with project-specific evaluation recommended for high-exposure or horizontal applications.

Scratch Resistance	● ● ●
Stain Resistance	● ● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Basalt & Andesite

A fine-grained volcanic stone with high mechanical strength, excellent abrasion resistance, and strong thermal stability. Well, suited for exterior paving, facades, urban landscapes, and climate-exposed architectural environments.

Scratch Resistance	● ● ● ● ●
Stain Resistance	● ● ● ●
Acid Resistance	● ● ● ● ●
Heat Resistance	● ● ● ● ●
Freeze Resistance	● ● ● ● ●

Limestone

A sedimentary stone offering soft visual consistency and balanced performance. Suitable for facades, wall cladding, and architectural detailing when properly specified for finishing, and exposure conditions.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Consumer Guide

Marble (Crystalline Texture)

A dense crystalline marble with very low water absorption and enhanced dimensional stability compared to conventional marbles. Suitable for interior flooring, wall cladding, and selected exterior applications when properly specified, while remaining sensitive to acidic exposure and surface wear.

Scratch Resistance	● ● ●
Stain Resistance	● ● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Marble

A refined calcite-based stone valued for elegant texture and light reflection, primarily suited for interior flooring, wall cladding, and decorative architectural applications, with limited suitability in exterior or high-traffic environments due to chemical sensitivity and surface wear.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Serpentinite

Antigorite-rich serpentinite is a magnesium-silicate stone offering distinctive green aesthetics and improved resistance to acids and abrasion compared to calcite-based stones. It is suitable for countertops, interior and selected exterior cladding, while horizontal performance depends on surface finish.

Scratch Resistance	● ● ●
Stain Resistance	● ● ● ●
Acid Resistance	● ● ● ●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ● ●

Onyx

A translucent decorative stone defined by luminous color depth and expressive veining. Primarily intended for interior feature walls, backlit panels, and luxury design applications.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Tra-Onyx

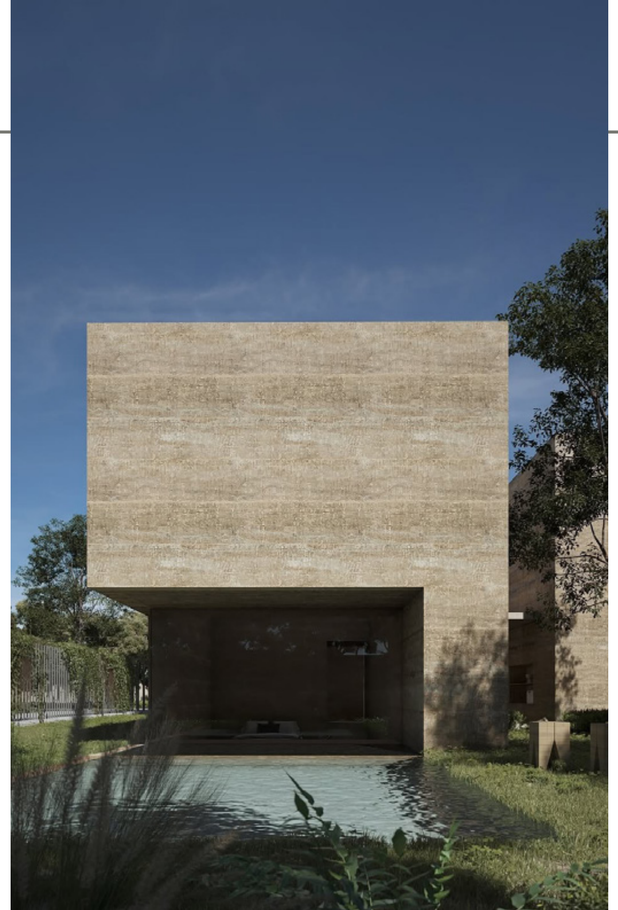
A visually expressive hybrid stone combining layered translucency and natural patterning. Recomme nded mainly for protected interior decorative applications with controlled environmental exposure.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Conglomerate

A naturally bonded aggregate stone offering distinctive texture and visual depth. Best suited for architectural cladding and design-driven surfaces, with project-specific evaluation required for exterior horizontal use.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●



Consumer Guide

Score	5	4	3	2	1

Rainbow

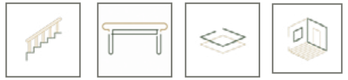
Rainbow Tra-Onyx features flowing bands of grey, beige, and brown, formed by layered travertine and onyx deposition. Its wave-like structure creates strong natural movement, while partial translucency allows for backlit applications, enhancing depth and visual impact—ideal for statement surfaces.

Pattern: Layered

Uniformity: Highly Varied

Visual Character: Expressive Movement

Applications



Interior Stairs & Steps

Table Tops

Indoor Flooring

Internal Walls

Ringwood-White

Predominantly ivory base with minimal dark banding, offering a cleaner, calmer interpretation of the pattern.

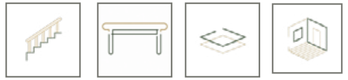
Pattern: Layered

Uniformity: Highly Varied

Visual Character: Expressive Movement

Bookmatch Capability: Yes

Applications



Interior Stairs & Steps

Table Tops

Indoor Flooring

Internal Walls

Ringwood-Light

Lighter overall appearance with increased ivory and beige layers, resulting in a softer and more refined visual.

Pattern: Layered

Uniformity: Highly Varied

Visual Character: Expressive Movement

Bookmatch Capability: Yes

Applications

Interior Stairs & Steps

Table Tops

Indoor Flooring

Internal Walls

Ringwood-Dark

Higher concentration of deep brown layers with stronger contrast and a more dramatic visual presence.

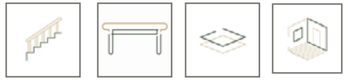
Pattern: Layered

Uniformity: Highly Varied

Visual Character: Expressive Movement

Bookmatch Capability: Yes

Applications



Interior Stairs & Steps | Table Tops | Indoor Flooring | Internal Walls

Ringwood-Honey

Balanced distribution of warm brown and cream tones with moderate contrast and a harmonious layered flow.

Pattern: Layered

Uniformity: Highly Varied

Visual Character: Experssive Movement

Applications

Interior Stairs & Steps | Table Tops | Indoor Flooring | Internal Walls

River

River Tra-Onyx is primarily travertine-based, featuring soft cream and beige layered bands enriched with localized onyx formations. The structure shows gentle linear flow with occasional translucent patches, adding subtle depth and visual contrast. Ideal for calm, elegant surfaces with refined natural character.

Pattern: Layered

Uniformity: Moderately Varied

Visual Character: Calm Balanced

Applications

Interior Stairs & Steps | Table Tops | Indoor Flooring | Internal Walls | Exterior Façade & Wall Clad-

Available Finishes

Polished

A glossy, mirror-like surface that maximizes color depth and visual clarity.

Leathered

A subtly textured surface enhancing tactile depth and natural character.

Honed

A smooth matte finish with soft light reflection and a natural appearance.

Waterjet

Precision-cut detailing achieved through high-pressure waterjet technology.
