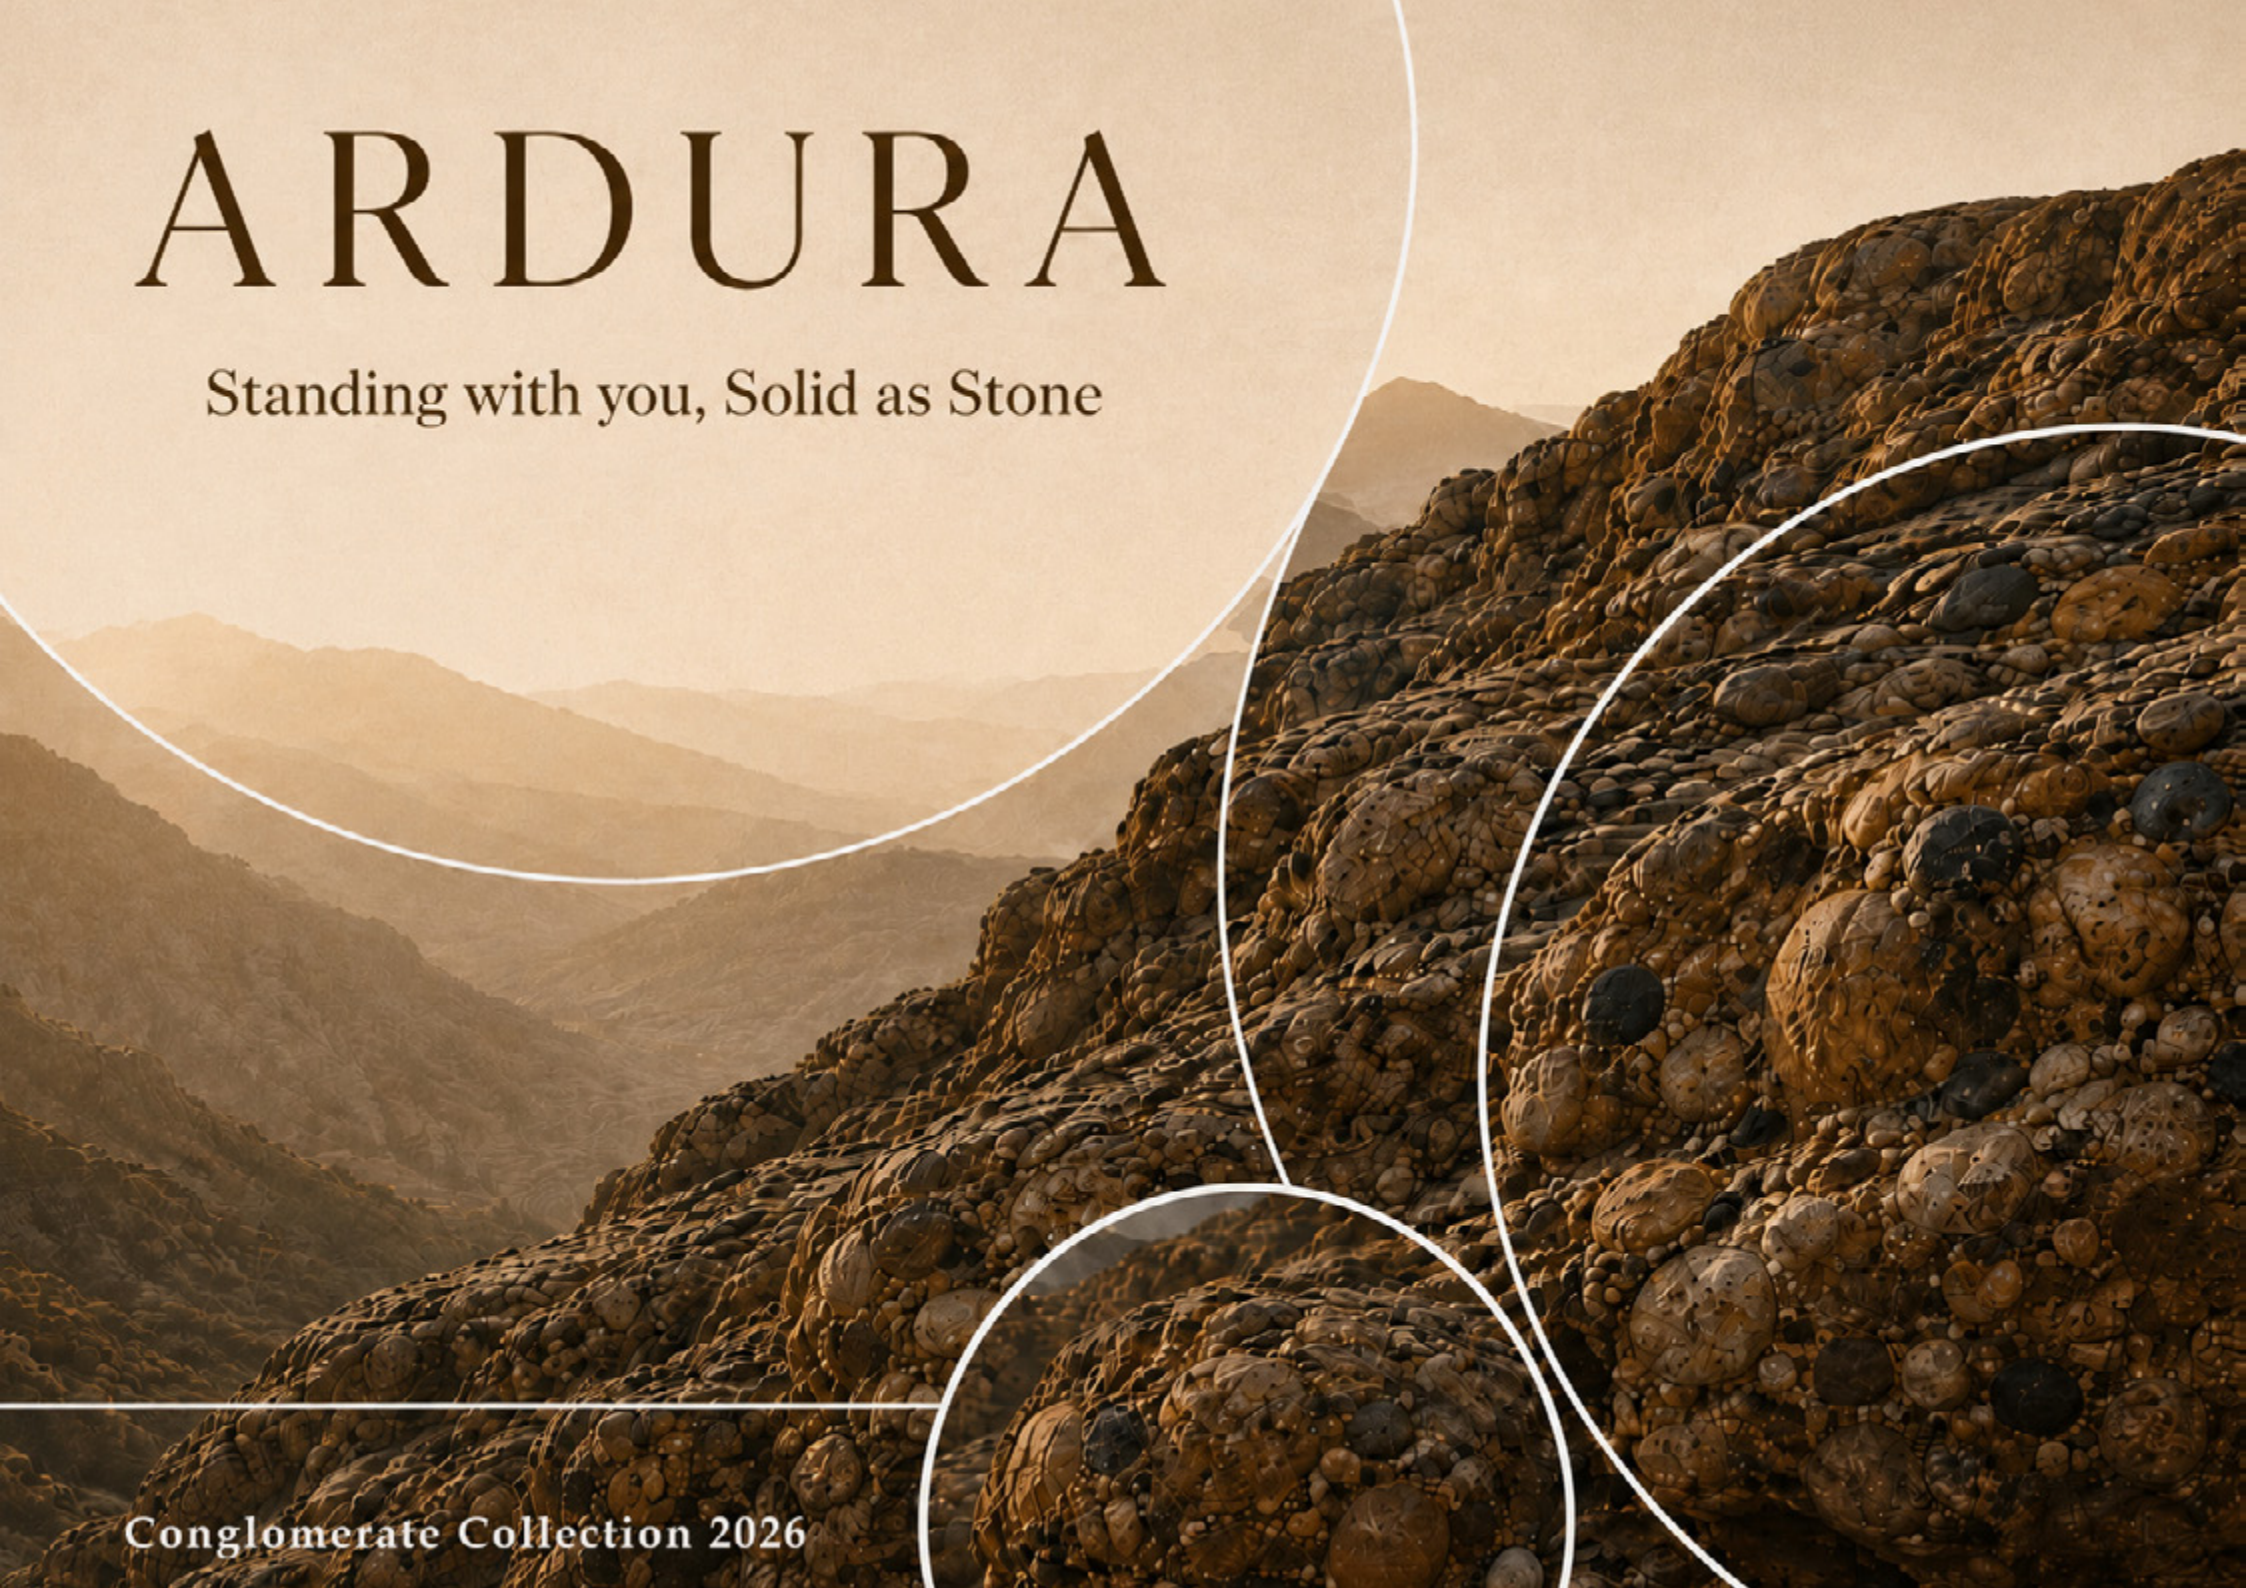
ARDURA

Standing with you, Solid as Stone



Conglomerate Collection 2026

INTRODUCTION

ENGLISH

Formed over geological ages, Conglomerate is distinguished by its rich texture, layered depth, and warm earthy palette. Ranging from ochre and terracotta to olive and deep mineral tones, it creates distinctive architectural surfaces with a timeless and expressive character.

العربية

تشكّل حجر الكونغلوميرات عبر عصور جيولوجية طويلة، ويتميّز بثراء نسيجه، وعمق طبقاته، ولوحته اللونية الدافئة المستوحاة من الطبيعة. وتتدرّج ألوانه من المغرة والتيراكوتا إلى درجات الزيتوني والألوان المعدنية العميقة، ليمنح الأسطح المعمارية طابعاً مميزاً يجمع بين الأصالة والتعبير الخالد.

ITALIANO

Formatosi nel corso delle ere geologiche, il Conglomerato si distingue per la ricchezza della sua texture, la profondità stratificata e la calda palette di tonalità naturali. Dall'ocra e dal terracotta fino alle sfumature oliva e ai profondi toni minerali, dà vita a superfici architettoniche distintive dal carattere espressivo e senza tempo.

РУССКИЙ

Сформированный на протяжении геологических эпох, конгломерат отличается богатой текстурой, многослойной глубиной и тёплой природной палитрой. От оттенков охры и терракоты до оливковых и насыщенных минеральных тонов, он создаёт выразительные архитектурные поверхности с ярким характером и неподвластной времени эстетикой.

Why Ardura?

Curated Earth-Toned Palette

Carefully selected hues ranging from ochre and terracotta to olive and deep mineral tones create a refined and architecturally balanced collection.

Refined Pattern Expression

Distinctive natural structures deliver visual interest and depth while maintaining harmony and design sophistication.

Architectural Versatility

Designed to complement contemporary, minimalist, hospitality, and luxury interior environments with equal confidence.

Distinctive Yet Timeless Character

A balance of expressive materiality and enduring elegance ensures long-term design relevance beyond temporary trends.

Statement-Oriented Selection

Chosen for projects where material identity matters, creating memorable architectural surfaces with a strong visual presence.

Quarry-to-Market Traceability

Full oversight from extraction to delivery, ensuring quality and traceability.

Diverse Finishes

Honed, Polished, Tumbled, Leathered, Flamed, Antique, Sandblasted, Bush-hammered, Rock Face (Split), Waterjet.

Conglomerate Bnefits

1. Distinctive Natural Composition

Distinctive mineral fragments and textures create richly unique surfaces.

2. Warm Earth-Toned Palette

Rich earthy tones bring warmth, depth, and a natural character.

3. Strong Architectural Presence

Bold patterns and depth create a defining architectural statement.

4. Timeless Design Appeal

Expressive yet elegant, Conglomerate suits both contemporary and classic spaces.

5. Statement Surface Potential

Ideal for feature walls, lobby floors, and impactful large-format applications.

Low Life Cycle Cost (LCC)

Easy Care & Maintenance

Favorable Life Cycle Assessment

Environmentally Responsible Material

Long-Term Durability

Luxurious Appeal

Fire & Heat Resistance

Stone Advantages

Craft & Capability

Advanced Italian Machinery

Precision-driven production using leading Italian technology.

Integrated Production Network

A curated network of qualified production partners operating under centralized quality control and unified standards, ensuring consistent quality.

Vein Alignment & Bookmatching

Enabled through origin-level control and integrated processing.

Product Forms & Fabrication Capabilities

Quarry Blocks · Slabs · Tiles · Cut-to-Size · Mosaics · Pavers · Curbs · Custom Fabrication.

Single-Source Stone Solutions

A comprehensive portfolio covering a wide spectrum of natural stones enabling cohesive and streamlined material selection for complete projects.

Centralized Quality Control

A unified quality control system ensuring consistent quality, visual coherence, and performance standards across all stone types.

Consistency Across Batches & Reorders

Ensuring visual and technical consistency across production batches and repeat orders.

At Ardura Design, natural stone is more than a building material—it is an essential part of the architectural language. We believe material selection should be integrated into the design process from its earliest stages, allowing materials to shape architectural vision rather than simply fulfill technical specifications. By combining architectural expertise with a deep understanding of natural stone, realistic material visualization, custom fabrication capabilities, and a reliable supply network, we bridge the gap between design intent and practical execution. Every recommendation is developed to ensure that the materials envisioned during design can be delivered with consistency, precision, and lasting architectural value.

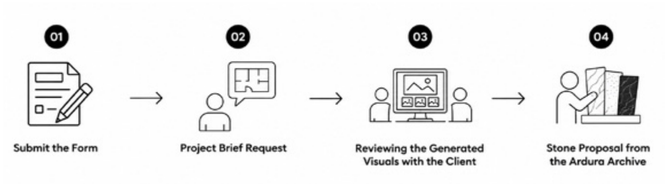
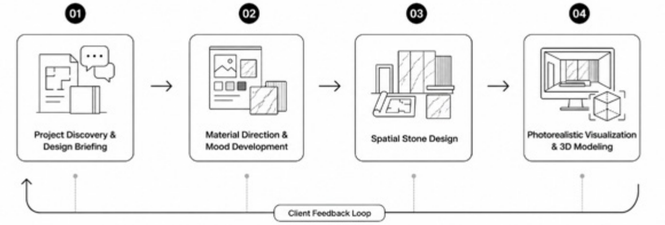
Ardura Design



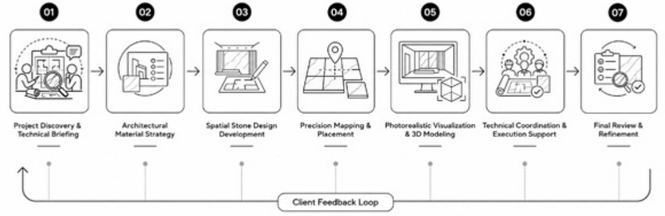
Basic Plan

The Basic Plan helps you choose the most suitable Ardura stone materials through design analysis and realistic visual simulations, ensuring each option aligns seamlessly with your space before execution.



Standard Plan

Share your project through drawings, references, or design intent, and we'll develop a complete spatial concept using real materials with high-quality visualizations, ensuring every design decision is validated before execution.



Premium Plan

The Premium Plan delivers a fully coordinated stone design process with precision stone mapping, technical collaboration, material sampling, and flawless execution from selection to installation.

Consumer Guide

Granite

A dense igneous stone offering exceptional strength, low water absorption, and outstanding resistance to abrasion, heat, and weathering. Ideal for high-traffic flooring, exterior paving, facades, and heavy-duty architectural applications.

Scratch Resistance	● ● ● ● ●
Stain Resistance	● ● ● ● ●
Acid Resistance	● ● ● ● ●
Heat Resistance	● ● ● ● ●
Freeze Resistance	● ● ● ● ●

Travertine

A naturally porous limestone characterized by warm color variation and strong architectural texture, widely used for interior flooring and wall cladding, façades, and landscaping, with project-specific evaluation recommended for high-exposure or horizontal applications.

Scratch Resistance	● ● ●
Stain Resistance	● ● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Basalt & Andesite

A fine-grained volcanic stone with high mechanical strength, excellent abrasion resistance, and strong thermal stability. Well, suited for exterior paving, facades, urban landscapes, and climate-exposed architectural environments.

Scratch Resistance	● ● ● ● ●
Stain Resistance	● ● ● ●
Acid Resistance	● ● ● ● ●
Heat Resistance	● ● ● ● ●
Freeze Resistance	● ● ● ● ●

Limestone

A sedimentary stone offering soft visual consistency and balanced performance. Suitable for facades, wall cladding, and architectural detailing when properly specified for finishing, and exposure conditions.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Consumer Guide

Marble (Crystalline Texture)

A dense crystalline marble with very low water absorption and enhanced dimensional stability compared to conventional marbles. Suitable for interior flooring, wall cladding, and selected exterior applications when properly specified, while remaining sensitive to acidic exposure and surface wear.

Scratch Resistance	● ● ●
Stain Resistance	● ● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Marble

A refined calcite-based stone valued for elegant texture and light reflection, primarily suited for interior flooring, wall cladding, and decorative architectural applications, with limited suitability in exterior or high-traffic environments due to chemical sensitivity and surface wear.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Serpentinite

Antigorite-rich serpentinite is a magnesium-silicate stone offering distinctive green aesthetics and improved resistance to acids and abrasion compared to calcite-based stones. It is suitable for countertops, interior and selected exterior cladding, while horizontal performance depends on surface finish.

Scratch Resistance	● ● ●
Stain Resistance	● ● ● ●
Acid Resistance	● ● ● ●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ● ●

Onyx

A translucent decorative stone defined by luminous color depth and expressive veining. Primarily intended for interior feature walls, backlit panels, and luxury design applications.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Tra-Onyx

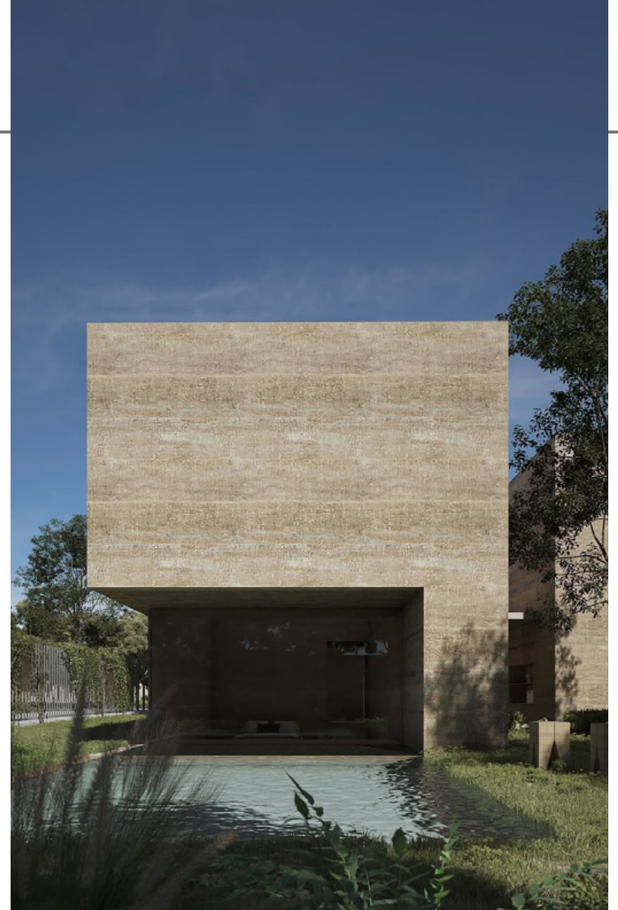
A visually expressive hybrid stone combining layered translucency and natural patterning. Recommended mainly for protected interior decorative applications with controlled environmental exposure.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Conglomerate

A naturally bonded aggregate stone offering distinctive texture and visual depth. Best suited for architectural cladding and design-driven surfaces, with project-specific evaluation required for exterior horizontal use.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●



Consumer Guide

Stone Type	Interior Flooring	High-Traffic Areas	Interior Wall	Facade & Exterior Cladding	Wet Areas	Outdoor & Landscaping	Countertops & Vanities	Decorative / Feature Elements	Backlit Applications

Description	Highly Recommended	Recommended under proper conditions	Recommended only with precise specification	Limited use – specific scenarios only	Not Recommended
Score	5	4	3	2	1

Arketa

A warm ochre-toned conglomerate with natural fragments and fine white veining, creating a textured and expressive surface. Its earthy palette and organic composition make it ideal for rustic, natural, and contemporary interiors that emphasize material authenticity. Well-suited for feature walls and statement surfaces with a grounded, tactile character.

Pattern: Conglomeratic

Uniformity: Moderately Varied

Visual Character: Expressive Movement

Applications

Fireplace Coating

Internal Walls

Interior Flooring

Interior Stairs

Table tops

Bafq

Bafq Conglomerate features a rich brick-red matrix densely packed with angular to sub-rounded clasts in warm ochre, mustard, and earthy tones, interwoven with fine mineral veins. The high contrast between fragments and matrix creates a vibrant, textural surface with strong visual depth, making it a bold choice for statement architectural applications.

Pattern: Conglomeratic

Uniformity: Moderately Varied

Visual Character: Expressive Movement

Applications

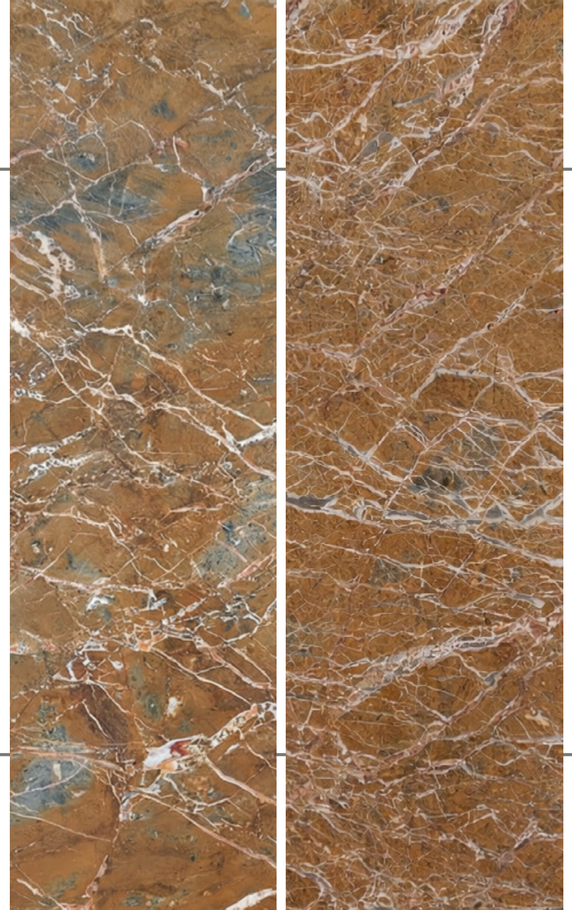
Fireplace Coating

Internal Walls

Interior Flooring

Interior Stairs

Table tops



Mesa

A brecciated conglomerate defined by a warm ochre-brown base, where angular fragments and fine veining create a richly layered, high-movement surface. Its bold, fragmented composition makes it particularly suited for statement applications, bringing depth, contrast, and a strong architectural presence to interior focal points.

Pattern: Conglomeratic

Uniformity: Moderately Varied

Visual Character: Experssive Movement

Applications

Fireplace Coating | Internal Walls | Interior Flooring | Interior Stairs | Table tops

Ochre

Ochre Conglomerate presents a warm ochre-dominated composition with large, elongated clasts in golden, mustard, and earthy tones, set within a red-toned matrix and intersected by fine mineral veins. The pronounced scale variation between fragments creates strong visual movement and layered depth, making it highly suitable for bold, statement-driven architectural surfaces.

Pattern: Conglomeratic

Uniformity: Highly Varied

Visual Character: Expressive Movement

Applications

Fireplace Coating

Internal Walls

Interior Flooring

Interior Stairs

Table tops

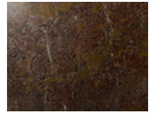
Available Finishes

Polished

A glossy, mirror-like surface that maximizes color depth and visual clarity.

Leathered

A subtly textured surface enhancing tactile depth and natural character.



Honed

A smooth matte finish with soft light reflection and a natural appearance.

Waterjet

Precision-cut detailing achieved through high-pressure waterjet technology.
