ARDURA

Standing with you,
Solid as Stone

ENGLISH

Natural Stone, Precisely Selected.

Crystalline Marble is a refined natural stone distinguished by its dense crystalline structure, luminous appearance, and elegant natural patterns. Its subtle translucency brings purity, light, and visual depth to architectural spaces, creating an atmosphere of calm luxury and contemporary elegance. With its durability, low porosity, and suitability for both interior and exterior applications, crystalline marble combines lasting performance with timeless beauty.

العربية

الحجر الطبيعي، مُنتقى بعناية فائقة

الرخام الكريستالي هو حجر طبيعي فاخر يتميّز ببنيته البلورية الكثيفة، ومظهره المشرق، وأنماطه الطبيعية الأنيقة. وتمنح شفافيته الرقيقة المساحات المعمارية إحساسًا بالنقاء والضوء والعمق البصري، لتخلق أجواءً من الفخامة الهادئة والأناقة المعاصرة. وبفضل متانته، وانخفاض مساميته، وملاءمته للتطبيقات الداخلية والخارجية على حدّ سواء، يجمع الرخام الكريستالي بين الأداء الموثوق والجمال الخالد.

ITALIANO

Pietra Naturale, Selezionata con Precisione.

Il Marmo Cristallino è una pietra naturale pregiata, caratterizzata da una struttura cristallina compatta, un aspetto luminoso e raffinati disegni naturali. La sua delicata traslucenza dona purezza, luce e profondità visiva agli spazi architettonici, creando un'atmosfera di lusso discreto ed eleganza contemporanea. Grazie alla sua durabilità, alla bassa porosità e alla sua idoneità per applicazioni sia interne che esterne, il Marmo Cristallino unisce prestazioni affidabili e bellezza senza tempo.

РУССКИЙ

Натуральный камень, отобранный с точностью

Кристаллический мрамор это высококачественный природный камень, отличающийся плотной кристаллической структурой, светящимся внешним видом и изысканными природными узорами. Его лёгкая полупрозрачность наполняет архитектурные пространства ощущением чистоты, света и визуальной глубины, создавая атмосферу сдержанной роскоши и современной элегантности. Благодаря своей прочности, низкому водопоглощению и пригодности для внутреннего и наружного применения, кристаллический мрамор сочетает в себе надёжные эксплуатационные характеристики и вневременную красоту.

Why Ardura?

Exceptional Color & Texture Variety

Ardura Marble offers a broad spectrum of natural colors and veining patterns, suitable for both classical and modern designs worldwide.

Tailored Stone Selection

Tailored marble selection based on crystalline structure, finish, and visual consistency—ensuring suitability for performance, longevity, and design intent.

Comprehensive Product Range

From standard formats to fully customized solutions.

Architectural Integration

Solutions aligned with environmental conditions and technical performance.

Visual Consistency & Supply Reliability

Controlled block selection, batch management, and scalable production capacity ensuring visual continuity and reliable supply for large-scale and long-term projects.

Quarry-to-Market Traceability

Full oversight from extraction to delivery, ensuring quality and traceability.

Diverse Finishes

Honed, Polished, Tumbled, Leathered, Flamed, Antique, Sandblasted, Bush-hammered, Rock Face (Split), Waterjet, Combined.

Crystalline Marble Bnefits

1. Natural Luminosity & Visual Depth

Its crystalline structure enhances brightness, clarity, and spatial depth.

2. Subtle Natural Translucency

Creates a refined sense of purity, elegance, and sophistication.

3. Low Water Absorption

Provides enhanced resistance to moisture and environmental exposure.

4. Interior & Exterior Versatility

Suitable for façades, cladding, flooring, and premium interior applications.

5. Durability & Structural Stability

Dense crystalline composition ensures long-term strength and reliability.

6. Contemporary Luxury Aesthetic

A preferred material for modern, minimalist, and high-end designs.

7. Sustainable Natural Material

A durable natural stone requiring minimal processing and maintenance.

Low Life Cycle Cost (LCC)

Easy Care & Maintenance

Favorable Life Cycle Assessment

Environmentally Responsible Material

Long-Term Durability

Luxurious Appeal

Fire & Heat Resistance

Stone Advantages

Craft & Capability

Advanced Italian Machinery

Precision-driven production using leading Italian technology.

Integrated Production Network

A curated network of qualified production partners operating under centralized quality control and unified standards, ensuring consistent quality.

Vein Alignment & Bookmatching

Enabled through origin-level control and integrated processing.

Product Forms & Fabrication Capabilities

Quarry Blocks · Slabs · Tiles · Cut-to-Size · Mosaics · Pavers · Curbs · Custom Fabrication.

Single-Source Stone Solutions

A comprehensive portfolio covering a wide spectrum of natural stones enabling cohesive and streamlined material selection for complete projects.

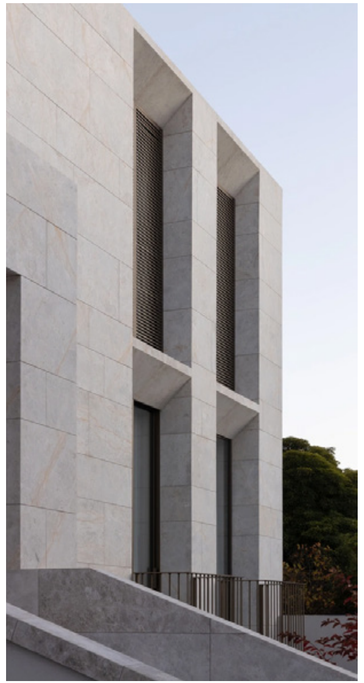

Centralized Quality Control

A unified quality control system ensuring consistent quality, visual coherence, and performance standards across all stone types.

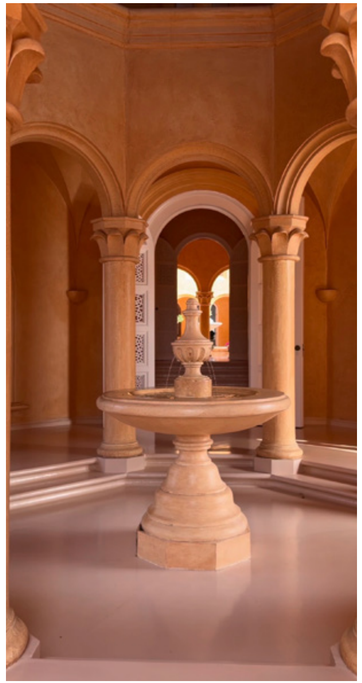

Consistency Across Batches & Reorders

Ensuring visual and technical consistency across production batches and repeat orders.

At Ardura Design, natural stone is more than a building material—it is an essential part of the architectural language. We believe material selection should be integrated into the design process from its earliest stages, allowing materials to shape architectural vision rather than simply fulfill technical specifications. By combining architectural expertise with a deep understanding of natural stone, realistic material visualization, custom fabrication capabilities, and a reliable supply network, we bridge the gap between design intent and practical execution. Every recommendation is developed to ensure that the materials envisioned during design can be delivered with consistency, precision, and lasting architectural value.

NeoClassic

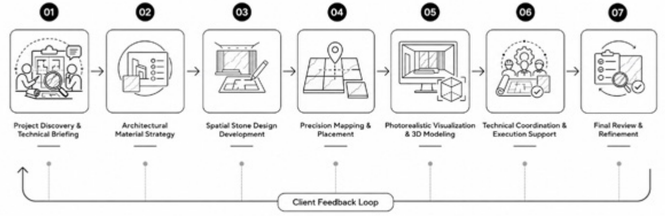

Basic Plan

The Basic Plan helps you choose the most suitable Ardura stone materials through design analysis and realistic visual simulations, ensuring each option aligns seamlessly with your space before execution.

Standard Plan

Share your project through drawings, references, or design intent, and we'll develop a complete spatial concept using real materials with high-quality visualizations, ensuring every design decision is validated before execution.

Premium Plan

The Premium Plan delivers a fully coordinated stone design process with precision stone mapping, technical collaboration, material sampling, and flawless execution from selection to installation.

Consumer Guide

Granite

A dense igneous stone offering exceptional strength, low water absorption, and outstanding resistance to abrasion, heat, and weathering. Ideal for high-traffic flooring, exterior paving, facades, and heavy-duty architectural applications.

Scratch Resistance	● ● ● ● ●
Stain Resistance	● ● ● ● ●
Acid Resistance	● ● ● ● ●
Heat Resistance	● ● ● ● ●
Freeze Resistance	● ● ● ● ●

Travertine

A naturally porous limestone characterized by warm color variation and strong architectural texture, widely used for interior flooring and wall cladding, façades, and landscaping, with project-specific evaluation recommended for high-exposure or horizontal applications.

Scratch Resistance	● ● ●
Stain Resistance	● ● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Basalt & Andesite

A fine-grained volcanic stone with high mechanical strength, excellent abrasion resistance, and strong thermal stability. Well, suited for exterior paving, facades, urban landscapes, and climate-exposed architectural environments.

Scratch Resistance	● ● ● ● ●
Stain Resistance	● ● ● ●
Acid Resistance	● ● ● ● ●
Heat Resistance	● ● ● ● ●
Freeze Resistance	● ● ● ● ●

Limestone

A sedimentary stone offering soft visual consistency and balanced performance. Suitable for facades, wall cladding, and architectural detailing when properly specified for finishing, and exposure conditions.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Consumer Guide

Marble (Crystalline Texture)

A dense crystalline marble with very low water absorption and enhanced dimensional stability compared to conventional marbles. Suitable for interior flooring, wall cladding, and selected exterior applications when properly specified, while remaining sensitive to acidic exposure and surface wear.

Scratch Resistance	● ● ●
Stain Resistance	● ● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Marble

A refined calcite-based stone valued for elegant texture and light reflection, primarily suited for interior flooring, wall cladding, and decorative architectural applications, with limited suitability in exterior or high-traffic environments due to chemical sensitivity and surface wear.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ●

Serpentinite

Antigorite-rich serpentinite is a magnesium-silicate stone offering distinctive green aesthetics and improved resistance to acids and abrasion compared to calcite-based stones. It is suitable for countertops, interior and selected exterior cladding, while horizontal performance depends on surface finish.

Scratch Resistance	● ● ●
Stain Resistance	● ● ● ●
Acid Resistance	● ● ● ●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ● ● ●

Onyx

A translucent decorative stone defined by luminous color depth and expressive veining. Primarily intended for interior feature walls, backlit panels, and luxury design applications.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Tra-Onyx

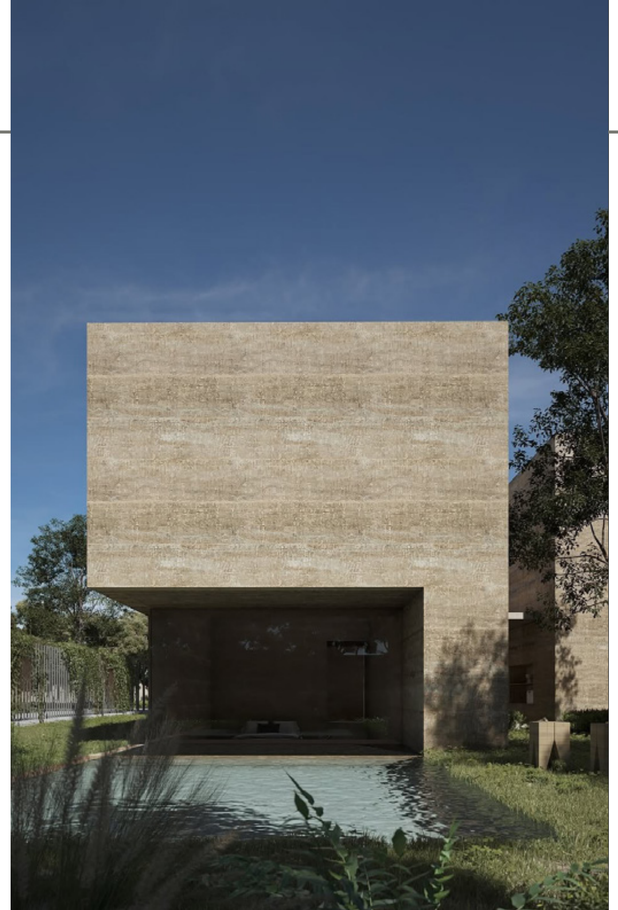

A visually expressive hybrid stone combining layered translucency and natural patterning. Recommended mainly for protected interior decorative applications with controlled environmental exposure.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Conglomerate

A naturally bonded aggregate stone offering distinctive texture and visual depth. Best suited for architectural cladding and design-driven surfaces, with project-specific evaluation required for exterior horizontal use.

Scratch Resistance	● ●
Stain Resistance	● ●
Acid Resistance	●
Heat Resistance	● ● ● ●
Freeze Resistance	● ● ●

Description	Highly Recommended	Recommended under proper conditions	Recommended only with precise specification	Limited use – specific scenarios only	Not Recommended
Score	5	4	3	2	1

Arctic Gold

A crystalline white marble with flowing blue-grey bands and subtle gold veining, creating a layered, directional pattern. The balance of cool and warm tones gives it a refined yet dynamic character, suited to contemporary, Japandi, and modern luxury interiors. Ideal for feature walls and large surfaces where natural movement can be highlighted.

Pattern: Veined

Uniformity: Highly Varied

Visual Character: Balanced Movement

Bookmatch Capability: Yes

Applications

Kitchen Countertops | Indoor Flooring | Internal Walls | Outdoor Flooring | Stairs | Paving

Horizon Noir

A dark crystalline marble with a deep blue-grey base and fine linear veining enriched by subtle warm gold tones. The directional pattern creates a layered and dynamic surface while maintaining overall visual cohesion. Well-suited for contemporary, modern luxury, and architectural interiors, especially in large surfaces where movement and depth enhance spatial character.

Pattern: Veined

Uniformity: Moderately Varied

Visual Character: Balanced Movement

Applications

Kitchen Countertops

Indoor Flooring

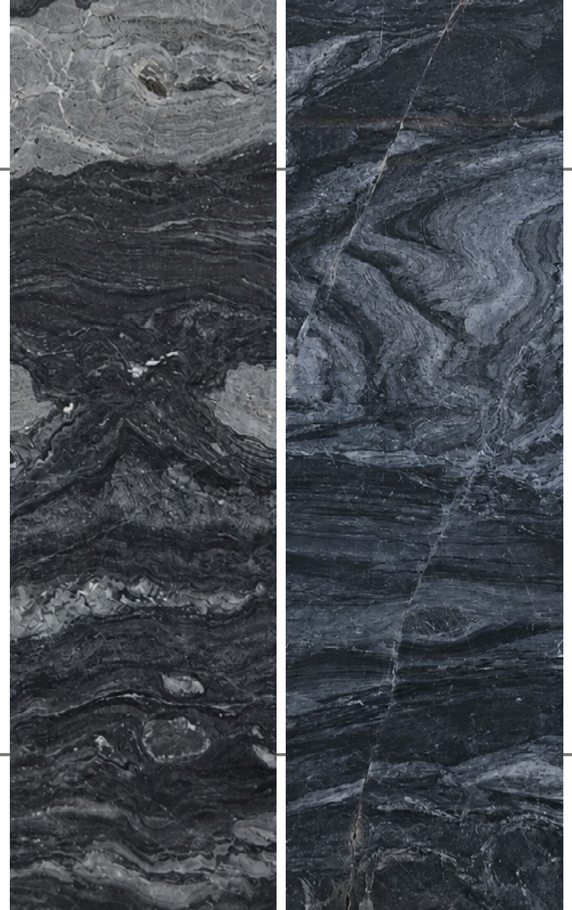

Internal Walls

Outdoor Flooring

Stairs

Paving

Ice Floe

Ice Floe is a crystalline marble defined by flowing grey to charcoal tonal layers, combined with semi-translucent mineral zones and soft, cloud-like formations. Across different sorts, the structure shifts between more fragmented, brecciated textures and smoother, continuous banding, creating a cold, atmospheric aesthetic reminiscent of frozen landscapes and glacial movement.

Pattern: Layered

Uniformity: Highly Varied

Visual Character: Expressive Movement

Applications

Kitchen Countertops

Indoor Flooring

Internal Walls

Outdoor Flooring

Stairs

Paving

Nocturnal Wave

A striking crystalline marble defined by deep charcoal-black bands layered with fluid ash-grey striations and subtle white accents. Its strong linear movement creates a directional flow and controlled visual rhythm, making it ideal for statement walls, bookmatched surfaces, and contemporary interiors seeking a bold, dramatic expression.

Pattern: Layered

Uniformity: Highly Varied

Visual Character: Dramatic Movement

Bookmatch Capability: Yes

Applications

Kitchen Countertops

Indoor Flooring

Internal Walls

Outdoor Flooring

Stairs

Paving

Panda Saymon

Panda Saymon is a high-contrast white marble with a clean, bright base intersected by bold black veining, ranging from fine linear traces to strong continuous bands. Its graphic composition balances minimalism and drama, making it ideal for statement surfaces such as feature walls, bookmatched panels, and premium interior spaces where contrast and clarity are essential.

Pattern: Veined

Uniformity: Highly Varied

Visual Character: Dramatic Movement

Bookmatch Capability: Yes

Applications

Kitchen Countertops | Indoor Flooring | Internal Walls | Outdoor Flooring | Stairs | Paving

Saymon S2

A crystalline marble featuring a cool white base intersected by bold, directional grey veining and fine underlying micro-lines. The contrast between the clean background and dynamic linear structures creates a refined yet expressive surface. Its directional character makes it particularly suitable for feature walls, bookmatched applications, and contemporary or minimalist interiors.

Pattern: Layared

Uniformity: Highly Varied

Visual Character: Dramatic Movement

Bookmatch Capability: Yes

Applications

Kitchen Countertops

Indoor Flooring

Internal Walls

Outdoor Flooring

Stairs

Paving

Scenico

A crystalline marble characterized by a deep grey base animated with flowing, smoky white and soft grey swirls. The pattern is highly dynamic, with layered movement and organic transitions that create a sense of depth and fluidity. Its bold contrast and expressive composition make it ideal for statement surfaces, feature walls, and contemporary interiors seeking a dramatic natural material.

Pattern: Veined

Uniformity: Highly Varied

Visual Character: Expressive Movement

Applications

Kitchen Countertops | Indoor Flooring | Internal Walls | Outdoor Flooring | Stairs | Paving

Silver Cloud

A crystalline marble with a cool light grey base, enriched by soft, cloud-like white formations and fine. The pattern combines gentle tonal transitions with subtle linear networks, creating a surface that feels both fluid and lightly textured. Its balanced visual movement makes it suitable for large surfaces, contemporary interiors, and spaces seeking a refined yet natural aesthetic without excessive contrast.

Pattern: Veined

Uniformity: Moderately Varied

Visual Character: Balanced Movement

Applications

Kitchen Countertops | Indoor Flooring | Internal Walls | Outdoor Flooring | Stairs | Paving

Tiyera

Tiyera is a crystalline marble characterized by elongated, directional layering in cool grey tones, enriched with subtle bluish undertones. Its fluid yet controlled movement creates a refined linear aesthetic, suitable for continuous surfaces and book-matched compositions with a calm but sophisticated visual rhythm.

Pattern: Layared

Uniformity: Highly Varied

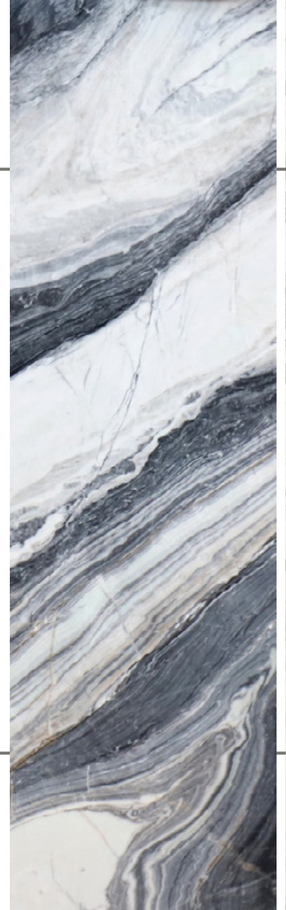

Visual Character: Dramatic Movement

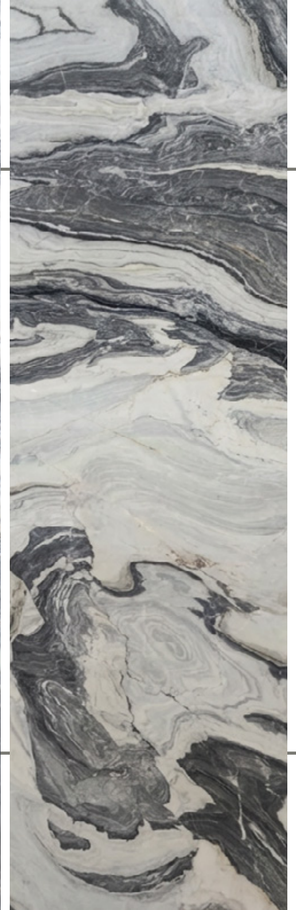

Bookmatch Capability: Yes

Applications

Kitchen Countertops | Indoor Flooring | Internal Walls | Outdoor Flooring | Stairs | Paving

White Tiger

White Tiger is a highly expressive marble with bold, fluid layering of white, silver-grey, and deep charcoal tones. Its strong movement creates a striking visual identity, ideal for statement surfaces, while its natural continuity supports impactful book-matched compositions. Despite its dramatic nature, the balance of light and dark allows controlled use in contemporary and high-contrast spaces.

Pattern: Layered

Uniformity: Highly Varied

Visual Character: Dramatic Movement

Bookmatch Capability: Yes

Applications

Kitchen Countertops

Indoor Flooring

Internal Walls

Outdoor Flooring

Available Finishes

Polished

A glossy, mirror-like surface that maximizes color depth and visual clarity.

Honed

A smooth matte finish with soft light reflection and a natural appearance.

Leathered

A subtly textured surface enhancing tactile depth and natural character.

Sandblasted

A fine matte texture with increased grip and an industrial aesthetic.

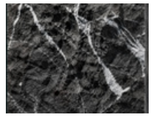

Bush-Hammered

A deeply textured, rugged surface with strong tactile and visual impact.

Rocked

A natural broken-edge texture evoking

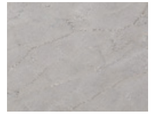

Waterjet

Precision-cut detailing achieved through high-pressure waterjet technology.

Tumbled

A time-worn finish conveying aged charm and historical character.
